STATE OF MONTANA - DEPARTMENT OF HIGHWAYS
PROJECT CONTROL UNIT
Helena, Montana

October 1, 1974

TO WHOM IT MAY CONCERN:

The increased complexity of the many details involved in the development of a construction project from its inception to the actual letting date dictates the necessity for scheduling the construction program as far in advance as possible; however, the uncertainty of the future availability of both federal and state funds makes it impractical to project the construction program too far. We have prepared this Tentative Construction Program for Fiscal Years 1975 - 1976 - 1977 - 1978 - 1979 and 1980 as a practical compromise of these two factors.

The Federal Aid Highway Act of 1973, which was passed by Congress in August of 1973, created a number of changes in the existing highway programs. One of the major changes under this new Highway Act was that Primary and Secondary federal funds apportioned for fiscal year 1974 and future fiscal years will be available only for rural areas (outside of urban areas of 5,000 population or more). For urban areas of 5,000 population or more, the new act provides for establishment of new urban systems and provides for Urban System funding to provide financing of construction work on these new systems. The Urban Extension funding for extension of Primary routes in these urban areas is continued under this act. To date the new Urban Systems and Urban Extension routes have been established and approved and priorities established in only a portion of the urban cities. After Urban System and Urban Extension routes are established and priorities are set up in the remaining Urban cities we will be adding additional construction projects to the tentative construction program.

The Federal Aid Highway Act of 1973 also created a number of new programs - five new Safety programs and a Priority Primary program. For these new safety programs the Montana Department of Highways has just recently received from the Federal Highway Administration the guidelines for implementing these new programs. We are now in the process of developing priorities which will be added to the construction program at a later date when the priorities are determined. For the Priority Primary program the Montana Department of Highways has established route priorities and has submitted the required data to the Federal Highway Administration for their approval of routes under this program. Upon approval of Priority Primary routes by the Federal Highway Administration, the Montana Department of Highways will establish priorities to be added to the Construction Program.

The financing of the Interstate System was extended to fiscal year 1979 by the Federal Aid Highway Act of 1973 and this Tentative Construction Program is set up to where the last Interstate contract lettings are scheduled for fiscal year 1979. However, Montana's estimated share of the yearly apportionments set up under this new act through fiscal year 1979 will leave us far short of providing enough funds to complete the

Interstate System in Montana. It appears very likely that in the future the Interstate completion date will be further extended to provide for sufficient financing to complete the Interstate System.

In addition to the projects which we have included in this Tentative Construction Program with proposed letting dates through fiscal year 1980, we have included any projects which are now being developed by the Montana Department of Highways which are scheduled beyond fiscal year 1980 and any projects which are being developed in the reconnaissance phase only.

One of the big problems that Montana has been experiencing since about 1967 is the withholding of federal fund apportionments by the Federal Highway Administration. This has caused numerous delays in scheduled contract lettings in the past and if this continues in the future it will affect our scheduled contract lettings.

Although this Tentative Construction Program represents a goal that we are exerting every effort to achieve, it is emphasized that it must not be construed as a definite commitment for the construction or priority of any project listed herein.

H. J. Anderson
Director of Highways

STATE OF MONTANA - DEPARTMENT OF HIGHWAYS
PROJECT CONTROL UNIT

TYPE OF WORK ABBREVIATION CODE

Apprs.	-	Approaches
Br.	-	Bridge(s)
G	-	Grading
GS	-	Gravel Surfacing
PCCP	-	Portland Cement Concrete Paving
PMB	-	Plant Mix Base (Bituminous)
PMS	-	Plant Mix Surfacing (Bituminous)
RROP	-	Railroad Overpass
RRUP	-	Railroad Underpass
Str.	-	Structure(s)
UP	-	Underpass

Minor irrigation and drainage structures, fencing, seeding and other similar type items are normally included in major projects and are only listed separately herein when they comprise a project within themselves.
